DETAILED ACTION

Election/Restriction

Applicant's election, without traverse, of the compound of Example 1 (specification page 8) as the species elected to begin prosecution is acknowledged. The election/restriction is hereby made FINAL.

Claim Objections

Claims 12 and 13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must depend from preceding claims in the alternate only. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The exact meaning of the term "R°" is unclear because it is undefined.

Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

regards as the invention. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 11 recites the broad recitation "...CNS disorders..." and the claim also recites "...including neurodegenerative diseases..." which is the narrower statement of the range/limitation. Other instances are similar (e.g. "...proliferative diseases...(benign and tumor prostate growth)...").

Claims 12 and 13 are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

Allowable Subject Matter

The elected species has been searched and is deemed free of the prior art. The subject matter of claim 8 is therefore allowable, although this claim is objected to because it depends from a rejected base claim, *vide infra*. The search was therefore expanded as called for under current Office Markush examination practice, a compound-by-compound search, to include a single additional species. That species is defined when: $R=R_1=R_2=H$; $A=C_1$ alkylene; X is a single bond; and $Y=H$. A rejection follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 9-11 and 14, in so far as they read on the species defined above, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by *Berichte der Deutschen Chemischen Gesellschaft [Abteilung] B: Abhandlungen* (1921), 54B, p. 1067-78 (CAPLUS abstract). The reference teaches applicant's compounds, for instance: RN=60330-48-5.
